# Pack Type

It's important that you choose the correct Pack Type for your logistic items.

If you are using the Product Creation Wizard, the correct Pack Type is filled in automatically.

Pack Type	Description
Base Unit or Each	Consumer Unit. Always the lowest level in the packing structure intended for sale.
Pack or Inner Pack	Consumer Unit. If the product also is sold in a larger package to the consumer than the lowest packaging level.
Case	Pack level containing x number of Base Units. This is the standard delivery unit for the item.
Pallet	The item of a product that a distribution usually buys from a supplier. Usually consists of a number of identical Cases. If the product does not have a Case, the pallet will consist of a number of identical Base Units.
Display Shipper	Display ready for sale. Contains Base Units, and is placed on a pallet.
Spesification	Do not have any Pack Type. The field must be empty.
